# TECHNICAL DATA SHEET OPP FILMS

**PEARL WHITE HIGH DENSITY LOW HEAT SEALABLE  
ONE SIDE CORONA TREATED**

**JS25/30/35/40/45/50H1-PLH**

## STRUCTURAL CONFIGURATION

- CORONA TREATED HEAT SEALABLE SKIN
- MODIFIED PEARL WHITE INNER SKIN
- MODIFIED PEARL WHITE CORE
- MODIFIED PEARL WHITE INNER SKIN
- UNTREATED LOW HEAT SEALABLE / LOW COF SKIN

### APPLICATIONS :

PEARL WHITE HIGH DENSITY LOW HEAT SEALABLE LOW COF ONE SIDE CORONA TREATED FILM FOR VARIOUS LABEL & SINGLE / TWO PLY PRINTING LAMINATION APPLICATION.

### DESCRIPTION :

Pearl White High Density Low Heat Sealable, One Side Corona Treated OPP Film with Very Good Barrier, Excellent Stiffness, Slip and Antistatic Properties for use in Label, Single / Two Ply Printing Lamination Application. High Density Provide the Film Excellent Stiffness for High Speed FFS Machines. The corona treated side is specifically designed for excellent adhesion of inks and lamination adhesives. Untreated side exhibits low seal initiation temperature, excellent hot tack / seal strength and excellent slip characteristics for uninterrupted running on high speed FFS machines.

### SALIENT FEATURES :

- Excellent Opacity
- Excellent Stiffness
- Excellent Surface Slip Properties
- Low Seal Initiation Temperature
- Excellent Hot Tack and Heat Seal Strength
- Brilliant Pearlicent White Appearance
- Very Good Barrier Properties
- High Surface Gloss
- Excellent Surface Treatment Retention
- Excellent Anchorage of Inks and Lamination Adhesive on Treated Side
- Excellent Machinability
- Suitable for Various Printing / Lamination Machines

\*Available in Inside / Outside Corona Treated, as per the requirement of the customer

The values provided in the Technical Data Sheet are typical performance data and are believed to be accurate. These are given in good faith, but users are advised to conduct their own tests on representative samples and not on the actual product dispatched. JINDAL POLY FILMS LIMITED doesn't guarantee or warranty typical values and fitness for its use for a specific purpose. The user is solely responsible for all determinations by the application of this information or the safety and suitability of our products, either alone or in combination with other products.

**Storage & Handling:** It is a fact that dyne level decays over time in BOPP films and the decay is further aggravated with extreme environmental conditions. If film rolls are to be stored for a long time, it is preferable to maintain a constant, preferably low temperature (below 30°C) and a low humidity (below 70% RH) to maximize shelf life of the product & to minimize dyne level decay.
